

Bearskin Meadow Camp Policy on Head Lice

DYF requires that all participants be free of nits and lice prior to attending a program.

Therefore, Parents/Guardians must perform a head check of each camp participant 48 hours before the first day of the program. Home screening decreases the risk of a head lice outbreak at a DYF program. For more information about how to screen for lice, please visit http://www.babycenter.com/0_how-to-tell-if-your-child-has-head-lice_66430.bc

If nits and /or lice are found prior to the first day of the program, a partial refund will be given.

If nits and/or lice are found or suspected at camp, a head check will be performed by a Healthcare Professional. This check will be done discreetly and away from other campers. If nits/lice are found during this check, the participant will be treated on site and parents/guardians will be notified. The Healthcare Professional will decide whether the child is to be taken home or to continue being treated at camp. If a participant is found to have lice/nits, the other participants in the cabin/deck will also be given a head check by a Healthcare Professional.

There is no refund of the camp fee if a child is sent home from a DYF program due to the presence of lice and/or nits.
